DESCRIPTION

Your health data on your wrist

Ever wondered how to visualize and manage your health data from your Apple Watch ? The wHealth Dashboard application is designed for this. Graphs, trends, progress to targets and statistics directly available on your Apple Watch.

The iPhone version also allows the creation of health reports over time (optional inApp purchase), and even to share its performances on social networks.

HIGHLIGHTS

- Over 40 different health data
- One year history in your Apple Watch
- Rolling or calendar adjusted periods (week, month and/or year)
- Advanced statistics per period
- Parallel comparison of current and past data, at any date and period.
- Fully customizable, 6 different graph styles with choice of color
- Enter new data in seconds
- Set a personal goal on any data, see the progress in the rings
- Get notified to help you reach your goals
- Create reports over time
- Share reports on social networks
